

AI SECURITY SCORECARD

Score Your *Security Setup* in Five Minutes.

A fast, honest self-assessment to see where your current security really stands, before you spend a dollar on new hardware.

Score each statement from 0 (not at all true) to 5 (fully true) by marking the boxes. Add up each category, then total all five for a score out of 100. Most organizations are surprised by where the gaps actually are, and it is rarely the cameras.

Camera Coverage & Image Quality

01 · /20

0 = NOT AT ALL 5 = FULLY TRUE

Every critical entry, exit, and blind spot has clear camera coverage.

☐☐☐☐☐☐

Footage is usable at night and in low light, not just daytime.

☐☐☐☐☐☐

Cameras resolve faces and license plates where it matters.

☐☐☐☐☐☐

We can locate and review any incident in under five minutes.

What your score means

91-100	Intelligence-led: you are operating at the leading edge.
71-90	Proactive: strong posture with a few gaps to close.
41-70	Developing: solid foundation, meaningful gaps remain.
0-40	Reactive: significant exposure worth addressing now.
